Art Unit: 1654

1. In view of the papers filed March 1, 2004, the inventorship in this nonprovisional application has been changed by the deletion of Hiroshi Susaki and Masahiro Ikeda.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of the file jacket and PTO PALM data to reflect the inventorship as corrected.

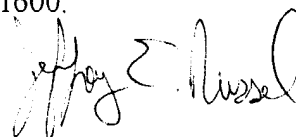

2. D'Amico et al (U.S. Patent No. 6,368,598), the European Patent Application 624,377, and the WO Patent Application 98/19705 are cited as art of interest, especially with respect to the spacer structures of instant claim 34. However, the claims remain allowable over these references for the reasons given with respect to claims 26, 35, and 38 in the Office action mailed August 22, 2002, section 13. Note that in D'Amico et al, Example 5, and in the European Patent Application '377, Tests I-IV, a polymer carrier is not present in the conjugate which is subjected to the in vitro enzymatic hydrolysis assays.

Claim 26 and its dependent claims are allowable over the Li et al article, applied in the Office action mailed October 31, 2003, because the Li et al article, which employs an antibody conjugate, does not provide any motivation to substitute a polysaccharide for the antibody.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey E. Russel at telephone number (571) 272-0969. The examiner can normally be reached on Monday-Thursday from 8:30 A.M. to 6:00 P.M. The examiner can also be reached on alternate Fridays.
